Challenge 9 – Smart Industrial Pollution Monitoring for Golden Corridor (Vapi– Ankleswar)

Domain: Environmental Sustainability

The Challenge: The industrial belt along Vapi, Ankleshwar, and Vatva faces significant air and water pollution from chemical and manufacturing units, with limited real-time monitoring and slow regulatory response to violations.

Objective: Build Agentic AI solutions that continuously monitor industrial emissions and effluents, detect violations, and trigger timely regulatory and community alerts.

Suggested AI Agents:

• Emission & Effluent Monitoring Agent

• Violation Detection & Compliance Agent

• Regulatory Alert & Escalation Agent • Public Health Risk Assessment Agent

• Industrial Pollution Dashboard Agent

Technology to be used – IBM Bob + IBM Granite LLM + IBM cloud
